IMPRIMERIE DE WITTERSHEIM,
Rue Montmorency, 8.

Vorrede.

Der Beifall welcher meiner Encyclopädie des Schachspiels zu Theil geworden, die Aufmunterungen meiner Freunde und der Wunsch mein Werk nicht unvollendet zu lassen, sind die Gründe welche mich veranlaßt haben die gegenwärtige Sammlung zu bilden, um sie dem Publikum vorzulegen.

Sie besteht aus mehr wie zwei tausend Problemen, welche Auszüge einer großen Anzahl älterer und neuerer Schriftsteller sind; und da diese Sammlung die wichtigste ist, welche jemals in dieser Art erschien, so wird sie natürlicherweise der zweite Theil meiner Encyclopädie, und dient derselben zur Ergänzung.

Alle mögliche Combinationen des Schachspiels aufzufinden und zu beschreiben wäre eine Arbeit welche die menschliche Kraft übersteigt; und fände sich wirklich irgendwo ein Genie, welches diese Fähigkeit besäße, so würde dieses Spiel viel von seinem Reize verlieren, das Erfindungsvermögen würde unnütz werden, und man würde in den verschiedenen Fähigkeiten der Adepten nichts weiter als ein mehr oder weniger entwickeltes Gedächtniß erkennen. Das Schachspiel hat im Gegentheil den Vorzug vor allen andern Spielen sich den Wissenschaften und Künsten anzuschließen, indem es sich auf unumstößliche Regeln stützt und dennoch dem Nachdenken ein unermeßliches Feld einräumt.

Einige zwanzig Buchstaben des Alphabets reichen zur Bildung fast aller Sprachen und zum Ausdrucke aller menschlichen Begriffe hin, wie groß und mannigfaltig daher müssen nicht die Verzweigungen werden welche man durch zwei und dreißig Schachsteine auf dem mit vier und sechzig Feldern versehenen Schachbrete hervorzubringen im Stande ist! Es würde daher ein vergebliches Unternehmen sein das Schachspiel durch Analysirung aller Zusammensetzungen und Züge ganzer Partien, selbst wenn man ihre Anzahl auf die theoretisch bekannten Anfangsgründe

beschränkte, erklären zu wollen. Der Unterricht meiner Meinung nach muß sich aus diesem Grunde auf gute Eröffnungen und gute Beendigungen der Partien bescheiden. Bei diesen beiden Extremitäten des Kampfs, wo die Anzahl der Züge beschränkt ist, sind die Variationen weniger zahlreich, die Fehler fühlbarer und, im letztern Falle besonders, sind sie unabhelflich.

Große Mathematiker haben vergebens versucht, wenn sie dem Studium des Schachspiels ihre Aufmerksamkeit schenkten, sich über die Mittelmäßigkeit zu erheben, und außerordentlich geschickte Schachspieler sind zu gleicher Zeit nur schwache Mathematiker gewesen, obgleich es unmöglich ist die große Analogie zwischen diesen beiden Wissenschaften (Leibnitz bediente sich dieses Worts) zu läugnen. Beim Schachspiele hängt alles besonders von den ersten Zügen ab, und das Lehrgebäude der Mathematik gründet sich ebenfalls hauptsächlich auf die ersten Lectionen des Elementarunterrichts; und obgleich die dadurch erzeugten Probleme in der Praxis vielleicht niemals ihre Anwendung finden, so dienen sie dennoch als Schlüssel der ganzen Wissenschaft. Derselbe Fall findet beim Schachspiele statt: man übt sich im Anfange auf eine große Anzahl von Eröffnungen, die man selten auf dieselbe Weise Gelegenheit hat wiederholen zu können; ist dieses Studium aber einmal ordentlich gemacht, so dient es zu einer Menge künstlicher Combinationen. Die ersten Züge erfordern viel Sorgfalt und Vorsicht: eine Menge von Partien würden verloren weil man sie schlecht angefangen hat, wie groß auch das Talent sein mochte mit dem man später verfuhr; sie sind wie Gebäude auf schlechtem Grunde gebaut: man stützt sie vergebens, da sie doch früher oder später zusammenfallen müssen.

Man kann den ersten Zug auf zwanzig verschiedene Arten spielen, den zweiten auf dreißig, und beim folgenden kann man eine noch größere Anzahl anwenden; die größte Schwierigkeit ist diese die beste Art zu finden; denn ein Zug verloren, ein Schachstein vor dem andern gespielt, führt, wenn der Gegner davon Vortheil zu ziehen weiß, zum Verlust der ganzen Partie. Es ist daher, wie schon gesagt, besonders wesentlich die ersten Züge gut zu studiren. Man findet deren eine vollständigere Auswahl in meiner Encyclopädie, wie in irgend einem andern Werke.

In der Mitte der Partien wo die Verzweigungen unendlich werden, häufen sich natürlicherweise die Schwierigkeiten, daher denn die größten Meister diejenigen sind, welche sich der größten Anzahl aller möglichen Fälle entgegen zu setzen verstehen, und auf diese Weise die Berechnungen ihrer Gegner errathen und vernichten. Keine Partie würde verloren werden, wenn der Spieler das Uebel im Ursprunge bemerkte. Das wahre Talent nun besteht darin bei dem geringsten Merkmale die verborgenen Absichten des Feindes zu erkennen, der Ausführung derselben entgegen zu arbeiten, aus der Vertheidigung, wenn es möglich ist, einen Angriff zu machen, seine Kräfte zu concentriren, indem man dem Anscheine nach flieht, und den Rückzug als ein Mittel zum Siege anwendet. Dieses Spiel gleicht in jeder Hinsicht der List des Krieges: Märsche, Gegenmärsche, auf gewissen Punkten bisweilen vorgebliche Schwächungen, Angriffe auf wenig bedeutende Plätze, um andere zu decken, Geschütze und Stellungen mit Absicht verlassen, ein wachsames Durchdringen der Taktik des Feindes, welchen man vor sich hat, anwenden und, mit einem Worte, sich bemühen durch List bisweilen die Stärke und Berechnung desselben zu vernichten, und durch Erfindungsgeist den Unterricht und das Wissen zu beleben.

Am Ende der Partien ist fast alles erzwungen, und da muß der richtige Zug gespielt werden, sonst ist die Partie verloren. Am Anfange oder in der Mitte des Spiels kann man manchmal durch einen Fehler in Verlegenheit gesetzt werden, und Hülfsmittel finden, aber hier giebt es keine

mehr. Aus diesem Grunde ist das Studium der Probleme unvermeidlich, und der Augenblick wo sich die Schönheiten in ihrem ganzen Lichte entfalten. Je mehr man in diesem Spiele fortschreitet, je unwiderstehlicher wird sein Reiz. Ich habe Gelegenheit gehabt zu sehen, auf welche verschiedene Weise sich dieses Interesse zeigte. Ich habe Personen gekannt welche ganze Nächte durchwachten um die Auflösung eines Problems zu suchen, die niemals die Geduld hatten eine ganze Partie in einem Autor zu examiniren oder selbst nur die Eröffnungen zu erlernen. Ich habe deren gesehen welche mehr Vergnügen in dem Studium der Meister, wie bei dem Spiele selbst fühlten. Es giebt Personen welche dergestalt ihre Ehre im Auge haben, daß sie den Streit des Einsatzes verachten, und ihren Platz verlassen, sobald sie den geringsten Fehler begangen haben. Es giebt andere, welche ihre Kräfte ein wenig länger versuchen, und bis dahin gehen, wo ihnen die Partie unwiederbringlich verloren scheint, und nie das fürchterliche Wort Matt abwarten können, ein Wort welches sie wie die Posaune des jüngsten Gerichts zu erschüttern scheint. Jeder Schachspieler endlich drückt auf seine Spielweise den Siegel seines Charakters, das heißt, daß es eben so viele Spielarten wie Spieler giebt. Die Eigenthümlichkeiten aller Meister zu erforschen ist, wie in allen Wissenschaften, das Mittel seine eigene Spielart zu entfalten, alle Quellen seines eigenen Genies zu benutzen, und dadurch endlich sich eine eigene Originalität zu schaffen. Das Studium der Probleme eröffnet eine unerschöpfliche Mine, eben so reich für den geübten Spieler wie für den Anfänger.

Unter dem Namen **Probleme** verstehe ich hauptsächlich die Stellungen am Ende der Partien, in welchen die Anzahl der Züge bestimmt ist; sei es **matt**, Remise oder mit einem Bauern eine Dame zu machen; sei es die Stellungen wo von beiden Spielern der welcher am Zuge ist **matt** geben kann; sei es das bedingungsweise **Matt** machen mit einem bezeichneten Bauern oder auf einem bestimmten Felde, u. s. w.; und endlich noch diejenigen Partien wo ich meinen Gegner zwingen muß mich **matt** zu machen (qui perd gagne), u. s. w.

Man wird in dieser Sammlung eine große Menge von Problemen finden, wo der **Matt** in einer bestimmten Anzahl von Zügen, nicht mehr nicht weniger, unvermeidlich ist; andere ebenfalls in denen Abänderungen demjenigen möglich werden welcher sich vertheidigt, von denen die meisten aber ihn um so eher ins Verderben stürzen. Auch wird man einige Probleme finden wo es dem zweiten Spieler möglich ist sich einen Zug oder zwei länger zu halten, indem er nutzlose Opfer bringt; andere die durch eine geringere Anzahl von Zügen aufzulösen sind, wie ich selbst in **Stamma** bemerkt habe. Dieses auszufinden ist ein Vergnügen welches ich dem Liebhaber überlasse.

Einige Probleme sind unausführbar in Deutschland, wo die Regel es nicht erlaubt zwei Damen, drei Springer, u. s. w., zu machen, einige andere sind es in Italien, wo man einen Bauern nicht im Vorbeigehen nehmen darf. Für diese geringe Anzahl welche im Localgebrauch nicht statt hat findet man eine bedeutende Entschädigung.

Der menschliche Verstand zeigt sich hier, wie in allen andern Dingen, von zwei Seiten, die eine ist die wo er sich auf Regeln stützt, und sie als unverletzbar ansieht, die andere wo er sich unruhig und rastlos bemüht denselben zu trotzen und sie unaufhörlich auszudehnen sucht; wo er sich beständig die Ruhe und den Genuß der erlangten Güter zum Ziel seiner Anstrengungen macht, und dennoch immer und ewig zu der Ueberzeugung gelangt, daß der

einzige Genuß welcher ihm auf dieser mangelhaften Erde zum Erbtheil wurde der des Vorrückens ist.

Auf diese Weise hat man in Deutschland, um die Combinationen der ersten Züge zu vervielfältigen, neue Schachsteine erfunden und sie den alten hinzugefügt. Ebenso wie die Dame den Marsch des Thurms mit dem des Läufers verbindet, so hat man Schachsteine geschaffen, welche den des Läufers und des Springers, des Thurms und des Springers, und einen welcher selbst den der Dame mit dem des Springers vereinigt, und welcher allein **matt** ohne Hülfe eines andern Schachsteines machen kann.

Der General **Nievelt**, in Holland, hat das Mittel erfunden, um die Forcen gleich zu machen, daß er die Stellungen der Schachsteine, ehe die Partie anfängt, verändert, und über ihren neuen Platz durchs Loos entscheidet. Andere haben Mittel gefunden daß drei oder vier Personen zugleich spielen können. Der berühmte Schachspieler **Legal**, in Frankreich, erfand am Ende des letzten Jahrhunderts die Partie der Bauern. In dieser Partie nimmt der eine von den beiden Spielern, die von gleicher Stärke sind, die Dame weg und ersetzt sie durch sieben oder acht Bauern, welche er nach seinem Gefallen, aber nicht weiter wie bis zur Mitte des Schachbretes, placirt, oder er nimmt seinen Thurm weg und ersetzt ihn durch drei oder vier Bauern. Diese Partie kann, durch die Hinzufügung einer größern oder geringern Anzahl von Bauern, als Thermometer zwischen den verschiedenen Forcen dienen; sie ist bei den besten Spielern in Paris ungemein beliebt. **Labourdonnais**, welcher diese Partie oft mit Herrn **Deschapelles** spielte, hat derselben seinen Ruf und seine Stärke zu danken. Obgleich diese Art zu spielen sehr einfach im Anfange ist, indem man, nachdem die Bauern placirt sind, nur zwischen acht oder zehn Zügen zu wählen hat, so bietet sie dennoch gegen die Mitte und das Ende sehr verschiedenartige Stellungen dar.

Ich führe hier als Muster einige dieser capriciösen Partien an; nämlich zwei, wo die Schachsteine sogleich beim Anfange versetzt waren: deren erste von Herrn **Kieseritzky**, in Paris, gespielt wurde, und die andere welche ich selbst, in Mannheim, mit dem Herrn **van der Hoven**, vormaligem Minister der Niederlande, gespielt habe. Auch gebe ich mehrere Partien mit Bauern welche ebenfalls von Herrn **Kieseritzky** gespielt worden sind.

Ich habe in diesem Werke Ziffern und Buchstaben für die Auflösungen angenommen, eben so wie in meiner **Encyclopädie**. Die Probleme sind durch Diagramme dargestellt; und da die Schachspielfiguren überall in der Welt beinahe dieselben sind, so werden sie, wie in meiner **Encyclopädie**, leicht zu verstehen sein.

Auf den Diagrammen haben alle Schachsteine die Form ihres Namens; der **Läufer** allein hat eine verschiedene Benennung in allen Sprachen: englisch heißt er Bishop, französisch Fou, u. s. w., und ich konnte ihm unmöglich alle Formen dieser Namen geben. Es ist daher nöthig hier zu sagen daß ich ihm die Gestalt der französischen Benennung gegeben, nämlich die welche der Folie geweiht ist: einen mit einer Schellenmütze bedeckten Kopf.

Ich habe es für unnütz gehalten bei meinen Auflösungen den Anfangsbuchstaben jedes Schachsteins zu setzen, da diese Namen in den verschiedenen Sprachen abweichen. Die horizontalen Linien sind durch Ziffern und die verticalen durch Buchstaben bezeichnet; durch dieses Mittel zeige ich das Feld welches man verläßt, und dasjenige welches man einnimmt, an.

Die Weißen befinden sich über der Linie und die Schwarzen unter derselben. Wenn man also unter der Linie anfängt, so sind es die Schwarzen die den ersten Zug haben. Sind sie gezwungen so habe ich die Züge des zweiten Spielers ausgelassen.

Die Nummern der Probleme welche wiederholt sind, und denen ein N (noir) folgt, zeigen an daß wenn die Schwarzen in diesen Problemen am Zuge wären, dieselben gewinnen würden.

Der Anfangsbuchstab, welcher gewissen Zügen folgt, zeigt den Schachstein an welchen der Spieler wählt wenn einer von seinen Bauern bis ins achte Feld gelangt: D zeigt folglich eine Dame, T einen Thurm, C einen Cavalier (Springer), F einen Fou (Läufer) an.

Für diejenigen Personen welche meine Encyclopädie nicht besitzen wiederhole ich die Zeichen welche darin angegeben sind, und setze sie hieher:

°	Nehmen.
+	Schach geben.
♀	Nehmen und Schachgeben.
o—o	Rochiren nach der Seite des Königs.
o-o-o	Rochiren nach der Seite der Dame.
△	Die Weißen haben die beste Stellung.
—┐	Die Schwarzen haben die beste Stellung.
═	Gleiche oder unentschiedene Partie.
⊖	Matt.

Die Probleme folgen der Nummerordnung der Züge. Sie fangen von zwei an und gehen bis zwei hundert und funfzig hinauf. Der Name des Autors befindet sich über dem Diagramm eines jeden Problems; diejenigen welche den Titel Amateur haben sind fast alle wirklich gespielt worden.

Das Schachspiel hat sich seit den letzten zehn bis zwölf Jahren sehr ausgebreitet, wozu besonders die Partien durch Correspondenz und ihre Celebrität viel beigetragen; die ersten sind zwischen Paris und London gespielt worden, andere zwischen Paris und Pesth u. s. w.; später gewann es durch den berühmten Match zwischen den Herren Saint-Amant und Staunton, welchen eine schöne Lithographie unsterblich gemacht hat; ferner durch die gelehrten Werke der Herren Lewis und Walker, welche fast in allen Sprachen übersetzt sind; durch diejenigen von Jänisch und Heydebrand; und endlich durch die periodischen Publikationen unter den Titeln: Le Palamède und L'Illustration, in Paris; The Chess Chronicle, Bell's Life, The Illustrated London News und The Pictorial Times, in London; die Illustration, in Leipzig, u. s. w.

Obgleich dies nicht dazu beigetragen das Genie des Schachspiels allgemeiner zu machen, so hat die Masse der guten Spieler jedoch bedeutend zugenommen.

Möge man mir diese gemüthliche Unterredung, welche ein wenig lang ist, verzeihen. Es ist mir zur Gewohnheit geworden, daß wenn ich mit den Schachspielliebhabern spreche, ich mir einbilde mich mit meinen Freunden zu unterhalten. Mögen sie diese neue Arbeit eben so gut wie meine erste aufnehmen, und ich werde mich glücklich schätzen eine Spur mehr in ihrem Andenken zurückzulassen.

Paris, den

Alexandre.

(1) Dans toutes les solutions, les Blancs se trouvent au-dessus de la ligne, et les Noirs au-dessous. Ainsi, si l'on commence au-dessous de la ligne, ce sont les Noirs qui ont le premier trait. J'ai jugé à propos de ne pas donner les coups du second joueur quand ils sont forcés. Les Numéros des Problèmes qui se trouvent répétés et qui sont suivis d'un *n*, indiquent que les Noirs ont le trait.

La lettre initiale placée à la suite de certains coups indique la pièce que choisit le joueur lorsqu'un de ses Pions parvient à la 8e case. Ainsi D indique une Dame, T une Tour, C un Cavalier, F un Fou.

Der Autor verfolgt die Auflösungen des letzten Problems nicht weiter, nur giebt derselbe an, daß man mit den Bauern Thürme macht, welche man nachher aufopfert, indem man dasselbe Manöver wiederholt, und so gelangt man den Matt in der angegebenen Anzahl von Zügen zu machen.

In der gegenwärtigen Stellung kann der schwarze Thurm wirklich kein Schach geben, der weiße König gewinnt einen Zug; man hat 11 Züge nöthig um den Bauern von h 5 nach h 7 zu bringen. Man braucht 3 Züge um den König in Opposition zu setzen. Um diese 14 Züge zu gewinnen wird es nöthig 14 Mal dasselbe Manöver zu wiederholen, und 14 mal 18 ist 252.

Rösselsprung.

Dieses Problem, in welchem der Springer alle Felder durchläuft ohne jemals zweimal dasselbe berühren zu können hat viele Mathematiker beschäftigt, aber keiner hat eine befriedigende oder wenigstens eine hinreichend einfache Auflösung gefunden; sie haben sehr schöne Zeichnungen für Ausführungen, jedoch ohne Methode sich deren zu bedienen, herausgegeben; oder ihre Methoden sind zu complicirt gewesen, wie besonders die der Herren **Euler** und **Vandermonde**: ersterer hat der Akademie von Berlin im Jahre 1795 eine Abhandlung über diesen Gegenstand eingereicht. Herr **Libri**, einer der ausgezeichnetsten Gelehrten Frankreichs, hat den 29. August, im Jahre 1842, der Akademie der Wissenschaften in Paris eine Abhandlung über denselben Gegenstand vorgelesen. Man kann einen Auszug davon, wie von der des Herrn **Euler**, in Le Palamède, October, November, December 1842, mit sehr schön gezeichneten Graphiken sehen.

Ich glaube den Schachspielliebhabern ein sehr leichtes Mittel zur Auflösung dieses Räthsels angeben zu können, und welches eben so leicht ist ihrem Gedächtnisse einzuprägen. Ich will hier eine sichere Regel aufstellen, um mit dem Springer ein gegebenes Feld des Schachbrets zu verlassen, alle anderen Felder zu durchlaufen, und wieder auf dasselbe oder selbst auf irgend ein anderes gegebenes Feld, zurückzukommen.

Man muß zu diesem Ende das Schachbret in vier gleiche Theile eintheilen, und auf die Felder der vier Viertel die Ziffern 1, 2, 3, 4, 5, 6, 7 und 8 setzen, in der Ordnung wie sie auf dem Diagramm 1 und 2 angegeben sind. Der Springer durchläuft in jedem dieser Viertel vier geometrische Figuren aus zwei Losangen und zwei Vierecken bestehend: zwei Vierecke stoßen, das eine an Nummer 5—3, das andere an Nummer 2—8, an, und zwei Losangen, deren eine an Nummer 1—7, und die andere an Nummer 4—6 anstoßen; von einer Losange geht er in ein Quadrat und von einem Quadrat in eine Losange über. Um dieses zu bewerkstelligen muß man den Nummern folgen an welche diese Figuren anstoßen, das heißt, man muß der Losange von 1 nach 7 und von 7 nach 1 folgen und dies in den ähnlichen Losangen des Schachbretes wiederholen; beim zweiten Lauf geht man in den vier Quadraten von 8 nach 2 und von 2 nach 8; beim dritten in den Losangen von 6 nach 4 und von 4 nach 6; beim vierten endlich, in den Quadraten, von 5 nach 3 und von 3 nach 5; und nachdem er viermal seinen Lauf auf dem Schachbrete gemacht, so hat er die sechzehn Figuren durchlaufen, und beendigt seine Reise (Diagramm 3 und 4).

Man kann auf jedem andern Felde anfangen, nur muß man in den vier Vierteln dieselben Nummern der Figuren durchlaufen, mit welchen man angefangen hat, ausgenommen, wenn man mit einem der angulären Felder des Schachbretes anfängt, wo das letzte Feld der ersten Losange frei gelassen werden muß, damit dem Springer ein Rückzug übrig bleibt.

Folgende Nummern dienen zur Erklärung des Vorhergesagten:

1—7.	8—2.	6—4.	5—3.
Losange.	Quadrat.	Losange.	Quadrat.
